An FDNS Audit (Foreign Worker Data Collection and Analysis Audit) is a process conducted by USCIS, specifically by the Fraud Detection and National Security (FDNS) Directorate.

Primary purpose of the audit is to verify the authenticity of the information submitted by employers and foreign workers for work visas such as H-1, L-1, etc.

**Pro-Active preparation for
FDNS site visit**

- Most FDNS worksite visits are unannounced
- Primary company designate from the US IMT (Pramod Shenoy) will be available to help guide the employee and liaise with the FDNS contact at the time of site visit.
- Employee's awareness about the petition (filed by LTTS)
- If the employee is working at a customer worksite, it may be necessary that the customer should be notified.

**What to expect during
FDNS site visit**

- FDNS officers will often ask for paystubs, W-2s, org charts as well as the ability to speak with both the company signatory as well as the employee.
- If the employee is not physically present due to vacation or authorized leave, it is permissible to ask the officer to re-schedule a site visit for another date.
- Make a note of any documents that the investigator reviewed.
- If the investigator requests to see documents, ask the investigator to be very specific about what documents s/he would like to review.
- Do not hand over any documents to the investigator for review that are private or confidential, or that was not specifically requested by the investigator.
- **DO NOT OVERSHARE.**
